## 17/07/17:

## Country Road by Grant Fikes

 Theme: Clue Symmetry \& Logic (for TheSubro)Rules: Draw a single non-intersecting loop in the grid that enters and exits each bold region exactly once. If a number clue is given in a region, that number indicates the exact number of cells used by the loop in the region. Unused cells cannot be orthogonally adjacent across different regions.

## 17/07/18:

## Tapa (Total False) by Serkan Yürekli Theme: Clue Symmetry and Logic (for Jamie Hargrove)

Rules: Variation of Tapa. Every given clue is lying in two ways: first, the number of given clues in that cell is false; second, the value of any given clues is not true for any part of the Tapa around that cell. For example, a 3 clue could actually indicate 24, but it could not indicate 2

| ${ }^{1} 2$ |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  | 1 |
|  |  | $1_{2}^{1}$ |  |  |  |
|  |  |  |  |  |  |
| 2 |  |  | 7 |  |  |
|  |  | 2 |  |  |  |

 (same number of clues) or 23 (the digit 3 appears). 0 is not a valid clue for this Tapa.

## Japanese Sums by Serkan Yürekli

 Theme: All Clues are Different Clues (for Randy Rogers)Rules: Place the digits 1-7 (1-9 for the example) in some of the cells, so that no digit is repeated in any row or column. Numbers on the outside of the grid indicate the sums of adjacent digit groups in that row or column, in order. Each sum is separated by at least one unused cell. A ? can represent any sum of 1 or larger.

17/07/20:
Tapa (Transparent) by Murat Can Tonta Theme: Clue Symmetry and Logic (for Veep)

Rules: Variation of Tapa Rules. The wall can travel through clue cells. Each clue now describes the entire $3 \times 3$ area the clue cell is in the middle of.

## 17/07/22: <br> Tapa (Hex) by Serkan Yürekli Theme: Clue Symmetry and Logic (for Chris Green)

Rules: Follow Tapa rules. Additionally painted cells cannot form three hexagons meeting in a point. There are no wall segments on cells containing numbers.
