

# Canal View (No Four in a Row) by Serkan Yürekli

Rules: Shade some empty cells black to create a single connected group. Cells with circles cannot be shaded, and the shaded cells cannot form a 2x2 square anywhere in the grid. Each numbered cell indicates the total count of shaded cells connected vertically and horizontally to that numbered cell.

There may not exist a run of four or more consecutive shaded or unshaded cells (including clue cells) horizontally or vertically anywhere in the grid.
