

# Japanese Sums by Thomas Snyder

Rules: Place the numbers in the indicated range (1-6 in the puzzle, 1-5 in the example) in some of the cells, so that no number is repeated in any row or column. Numbers on the outside of the grid indicate the sums of adjacent number groups in that row or column, in order. Each sum is separated by at least one unused cell. A ? can represent any sum of 1 or larger.
